

CCTV SURVEYS

A quality CCTV pipeline inspection service for drains.
Sewers and other pipework applications.

Using the best available equipment and technology, all surveys are to Water Industry standards on computerised reports and presented in DVD format. Our work is widely accepted in Water Authorities, the Highways Agency, Structural Engineers and leading construction and civil engineering.

All our surveyors are fully qualified in the following:

- ~ **New Roads and Streetworks Act 1991**
- ~ **Safe Working in Confined Spaces**
- ~ **Water Industry Training Association (WITA)**
- ~ **Use of Electronic Data Capture Equipment**

Draincure UK has over 15 years of experience which enables us to offer the comprehensive services listed below:

Surveys by fully remotely controlled axial viewing or pan And tilt cameras.

Surveys carried out in all types of pipe/drains and other enclosed ancillaries/structures, e.g., boreholes, shafts, etc. Surcharged systems can be surveyed using the latest techniques (sonar)

All reports are generated to international sewer coding standards (OS20X classification) or tailored to suit clients' needs.

Computer validation of all data in WinCan format.

Surveys and reports can be produced digitally in DVD format and Instantly on CCTV rig.

Off-road surveys.

Confined space entry.

Whatever your confined space working requirement, we can provide a managed service in full accordance and conformity to all statutory requirements, including Confined Space Regulations 1997 and the Approved Code of Practice.

Confined space work requires a full Risk Assessment to be carried out prior to works with operations being undertaken to a safe system of work.
